Oak Ridge, TN 37830

Re: 01-0236-03  
64598

Dear Mr. Knight:

This correspondence is in response to your application dated May 6, 2011. The information which you provided has undergone a preliminary review by the permit program.

It has been determined that fluorination of centrifuge parts would constitute *insignificant activity* or *insignificant emissions unit*, as defined in part 1200-03-09-.04(2)(a)3. of the Tennessee Air Pollution Control Regulations. Specifically, the proposed operation would result in potential emissions of less than five (5) tons per year of each air contaminant and each regulated air pollutant that is not a hazardous air pollutant, and less than 1,000 pounds per year of each hazardous air pollutant.

For new sources, subparagraph 1200-03-09-.04(4)(a) of the Tennessee Air Pollution Control Regulations requires that the request for designation as an insignificant emissions unit be made at least thirty (30) days prior to the estimated starting date of construction. Your applications are accepted as the required notification.

All applicable air pollution regulations must still be met by your facility.

If you have any questions concerning this correspondence, please contact Olga Jacobsen at (615) 532-0581.

Sincerely,

*Malcolm H. Butler*

John A. Trimmer  
Chief, East Tennessee Permit Program
